

Learn Skills. Be Awesome.

DIY is a community for kids to get new skills and learn all the ways help make the world. From Animator to Wind Engineer, DIY Skills help kids discover new abilities they'll use for the rest of their lives. On our website and mobile app, kids can browse thousands of projects, try them, share what they make and get awesome embroidered patches for the Skills they learn.

Go to diy.org and sign up with your kid.

DIY is safe! Parents get their own online dashboard to follow their kid's activity, and can make sure they're not sharing anything that should be private.
