

Learn Skills. Be Awesome.

DIY is the best way for kids to learn new skills, meet others who share the same passions, and generally be awesome. We'll be using DIY in our classroom to explore new subjects while practicing skills. Kids can browse thousands of projects, try them, and keep a portfolio of what they make and do.

Go to diy.org and sign up with your kid.

DIY is safe! Parents get their own online dashboard to follow their kid's activity, and can make sure they're not sharing anything that should be private.
